SUPERIOR HORSESHOE NAILS THAT MAKE THE DIFFERENCE

### INTRODUCTION

### Liberty, a nail evolution

Liberty horseshoe nails have been developed because of the worldwide need for a better option in the top quality nail segment. Liberty nails complement the range of products, that the Royal Kerckhaert Horseshoe Factory offers in the best possible way.

The Liberty nail provides much better material, design features, finish, consistency and packaging than any nail available anywhere. That is why the brand new horseshoe nail program has become premium choice with top farriers all over the world, in only a few years time.

All Liberty nails are developed and produced according to Kerckhaert's own innovative and uncompromising design. The result is a brand new horseshoe nail program which takes quality to a higher standard in the farrier industry.

Liberty horseshoe nails are made of superior material in a manufacturing process which is fully controlled and managed by the Royal Kerckhaert Horseshoe Factory using the latest computer controlled manufacturing technology. With over 30 quality control checks during the production process we can already guarantee a superior and consistent quality horseshoe nail today, that others can only dream about.

Why don't you let us take you on a tour of absolute Liberty, so you too will know what the buzz is all about and learn - if you do not already — why you too will want to make them your own choice of nails to use. Whatever you are looking for in horseshoe nails: looks, variety, sharpness, quality, smoothness, price, consistency, longevity, packaging or perhaps just the right fit and very best performance ever; Liberty already has it all.

- "I really like the Liberty nails, they drive great and fit perfectly in the Kerckhaert shoes."
- "I love using the Liberty nails. I am really happy with the quality and consistency of the nails. They drive and finish nicely."
- "The Liberty nails are the cleanest, most consistent nails I've ever driven. They drive right where I want them, every single time. No question."
- "After getting a sample of the Liberty nails and giving them a try, they are the only nails I'll use. They are a great nail."
- "I like the Liberty nails. I can feel the trademarked side and they drive true. I don't miss a beat with them."
- "I have had problems with another brand of nails in the past. They would buckle in driving and would not wring cleanly. These issues seem to have been addressed with the Liberty nail. I was looking for an alternative, and I will keep using the Liberty nails."
- "I used a Kerckhaert DF shoe with Liberty nails. It was my first time to use the Liberty nails; I really liked them. Easy to drive, very little drag, and plenty of length."
- "Now the Liberty was a different story. That is a great nail. There is nothing that I don't like about it. Every Liberty nail that I have driven is beautiful."
- "Best nails I have ever driven. The points are consistently sharp, the drive is just right and they clinch well. Don't get me wrong, there are other good nails, I've used them for a number of years, but the Liberty nails- they are awesome."
- "I really liked these nails. They drove very smoothly and had a very nice finish to them!"

### **CONICAL NAIL HEAD**

- Smooth transition from nail head to shank and shaft
- Precise fitting into the square hole in the foot surface of the horseshoe
- · Hoof wall stays healthy

Ensures optimal hold of the horseshoe

### **SMOOTH SHAFT**

- Always correct nailing, even with different hoof wall angles
- Fewer hammer blows needed
- Easy clinching

Very smooth finish

### THE BEVELS

 Easy drive because of smooth bevelled edges on the shaft

It's a joy to work with Liberty horseshoe nails

### PERFECT BEVEL OF POINT

 Individually designed for specific models and sizes

Nails come out where the farrier wants them to

# • Firm and a very sharp point Damage of the hoof wall is reduced to a minimum

# THE NEW STANDARD COPPER COATED HORSESHOE NAILS

Antimicrobial properties	$\checkmark$
Designed to benefit the horse	✓

### **Liberty Cu - E**

The European standard design nail is actually the classic day-to-day nail which has been on the market for many years. This is a multi-purpose nail which can be used in all of the European styles horseshoes and sport disciplines. Fits very well in V-fullered shoes and is available in a large variety of sizes. Copper coated for stronger and healthier hooves.

	250

	100
E8	(707-0110-089)

### **Liberty Cu - E SLIM**

This European standard design nail has a longer and thinner shank compared to the regular E nails. The advantage of these nails is that you can drive the nails higher in the hoof wall without causing the hoof wall to crack, especially on thin walled horses. The smaller sizes also can be used for aluminum or steel race plates. Fits very well in V-fullered shoes. Copper coated for stronger and healthier hooves.

250

### **Liberty Cu - LX**

For those who need a very slim nail, the Liberty LX is the perfect solution. LX stands for light, durable and has a great fit in the V-fullered shoes. Using this nail reduces damage to the hoof wall even more. The shank of LX has an even slimmer shank compared to the E SLIM nails. Copper coated for stronger and healthier hooves.

### **Liberty Cu - FJ**

One of the most popular Liberty hoof nails to use in aluminium and steel race plates. The right balance between head, neck and shank contributes to a great hold of the shoe. Furthermore, this nail can be used for trotting shoes or sliding shoes when a slimmer nail is required. Copper coated for stronger and healthier hooves.

### **Liberty Cu - SB (SLIM BLADE)**

Traditional flat head SLIM BLADE nail to use in American style horseshoes and creases. This nail is a classic when it comes to performance and durability. Copper coated for stronger and healthier hooves.

250

5 SLIM

(707-2125-059)

### **Liberty Cu - COMBO SLIM**

Designed for heavier shoes. As there is more material in the head and shank, this nail will perform great when used in tougher conditions. The angled head design creates a great pitch for higher and stronger nailing. Also great when using shoes for a second time. Copper coated for stronger and healthier hooves.

250

COMBO 5 SLIM (707-3125-059)

### **Liberty E**

The European standard design nail is actually the classic day-to-day nail which has been on the market for many years. This is a multi-purpose nail which can be used in all of the European styles horseshoes and sport disciplines. Fits very well in V-fullered shoes and is available in a large variety of sizes.

250

### **Liberty DRAFT E XL**

These nails are actually part of the E-headed nail family, but for the larger shoes found on the Big Foot and Workhorse program, ideal for Draft horses. The main differences between these Draft XL nails and the E-headed nails are the slightly bigger heads for more traction plus extra length for stronger nailing.

100

DRAFT E8 XL (707-4010-081) DRAFT E10 XL (707-4010-101)

DRAFT E9 XL (707-4025-091)

### **Liberty LX**

For those who need a very slim nail, the Liberty LX is the perfect solution. LX stands for light, durable and has a great fit in the V-fullered shoes. Using this nail reduces damage to the hoof wall even more. The shank of LX has an even slimmer shank compared to the E SLIM nails.

### **Liberty NON-SLIP**

Based on the design of the E and E SLIM nails, this nail has a hard tungsten pin in the head for extra wear and grip, improving safety on tarmac roads. Fits very well in V-fullered shoes and is available in a large variety of sizes. Each pin is placed exactly in the middle and has the same height.

### **Liberty SPECIAL**

Based on the design of the E and E SLIM nails, but produced with another production technique. Because of this different technique, these nails are a little softer and easier to clinch, without compromising their strength and durability. Fits very well in V-fullered shoes.

E3 E4 E5 (707-2650-030) (707-2650-040) (707-2650-050)

250

ESL3 ESL4 ESL5 (707-2525-030) (707-2525-040) (707-2525-050)

### **Liberty JC**

This nail has become a multi-purpose nail. The main difference, compared to the regular European standard nails, is that the shank is longer and thinner, the head is more square and the crown is a bit higher for extra traction. Fits very well in V-fullered shoes and is available in a large variety of sizes.

### **Liberty JC TRAIT (DRAFT)**

These nails are actually related to the JC nails, but for larger shoes found on the Workhorse program, ideal for Draft horses. The main differences between these JC TRAIT nails and the JC-headed nails are the slightly bigger head for more traction plus extra length for stronger nailing.

JC4 TRAIT (707-3410-040) JC6 TRAIT (707-3410-060) 250 JC5 TRAIT (707-3425-050)

size of hammer.

The design of the head provides a maximum striking surface on every weight class and with every Liberty nail. Wringing/snapping off a nail goes with great ease, due to the straight design of the head and perfect fit with every Liberty nail.

Available in 3 different weight classes:

6 oz. (170 gr), 7 oz. (200 gr), 8 oz. (225 gr), 9 oz. (255 gr)

Use the weight you prefer in combination with the appropriate **LIBERTY NAILS** and you will have a perfect result every shoeing job!

### **Liberty M**

The head of the M nail is more narrow and fits deeper into the fuller. The Liberty M nail is more stable and allows the farrier to use these when horseshoes are used for a second shoeing period. Fits very well in V-fullered shoes and is available in a large variety of sizes.

### **Liberty RH**

Regular head nails come in a nice variety of sizes so they can be used in all kinds of circumstances, on all kinds of horses. Just like the SLIM BLADE, this RH is a real classic, but more among the **bigger horses**, working on harder terrain. These nails feature a great pitch because of a smart head design.

250

RH5 (707-0925-050)
RH6 (707-0925-060)
RH7 (707-0925-070)

100

RH8 (707-0910-080)

### **Liberty REG**

The head of these REG nails is smaller but thicker than the RH nail. The 4 side-bevels give this nail a very slim look and an excellent, smooth drive while the neck locks perfectly well in shoes with an American V-crease. The angled head design creates a great pitch for higher and stronger nailing.
